QUALIFICATIONS

- 15+ years of experience as a **Senior Full Stack C# Web Developer** delivering enterprise-level applications using **.NET Core, ASP.NET MVC, and Web Forms**.
- Strong expertise in **ASP.NET, Web API, MS SQL Server, Cosmos DB and Google Firebase Data Stores, LINQ, and XML**, with proven ability to build scalable and high-performance solutions.
- Proficient in **front-end technologies**: HTML, CSS, JavaScript, and **Vue.js (3+ years)** for client-side development.
- One year of hands-on experience developing, maintaining and supporting web apps using ASP.NET Core and Blazor, delivering modern component-based solutions.
- 10+ years of experience designing and supporting **RESTful and SOAP-based ASP.NET Web Services**.
- Hands-on experience with **Microsoft Azure Cloud Services** (PaaS, App Services, Azure AD, VMs, SQL Azure, Azure DevOps).
- Skilled in **CI/CD pipelines** using Jenkins, Git, and Tortoise SVN for automated builds, deployments, and application monitoring.
- Solid knowledge of **SharePoint Development** with practical implementation experience.
- Strong understanding of **software architecture patterns** (MVC, MVVM, SPA) and best practices in application design.
- Full Software Development Life Cycle (SDLC) experience including **requirements gathering, development, testing, deployment, and maintenance**.
- Quick learner with proven ability to **adapt to new technologies**, evaluate tools through **proof-of-concepts**, and integrate them into enterprise solutions.

EXPERIENCE

Technical Lead / Product Manager

SD Wellness Center | January 2026 – Present

- Lead the development and product management of **HospiGenIA**, a cloud-based healthcare platform serving physicians, patients, clinics, and healthcare organizations.
- Define product requirements for Electronic Medical Records (EMR), patient management, appointment scheduling, clinical documentation, and medical workflows.

EVO – Cloud-Based Gym Management Platform

Lead product strategy and delivery of EVO, a SaaS platform for gyms, fitness centers, and wellness organizations.

Define and prioritize features including member management, subscriptions, attendance tracking, scheduling, trainer management, and reporting.

Sr. Systems Engineer – Web IT Digital Product Development

Red Lobster | 11/2021 – 12/2025

- Delivered key enhancements to the eCommerce website to optimize guest experience and streamline the online ordering process.
- Developed and supported Supply Chain and Culinary applications including *iKitchen*, *Menu Systems*, and *DASH POS systems*.
- Implemented Single-Use Serialized Coupons in Adobe Campaign, significantly reducing fraud and improving promotional efficiency.
- Designed and configured Elasticsearch custom logging with APM and RUM for enhanced application performance monitoring and diagnostics.
- Led development and support of a new online reservations system, integrating APIs with Google Reservations and QSR platforms to improve booking efficiency.
- Developed a modern online reservation system, “Reserve a Table,” using ASP.NET Core and Blazor Server in .NET 10 leveraging reusable Web UI components for a responsive and interactive UI/UX experience.

MS Full Stack .NET, C#, SQL Developer *Signature Consultants – NCLH 06/2021 to 11/2021*

- Web Form custom-built application called PODS (procurement Operational Database) support and development
- Logistic Providers Interface to various Procurement applications using SSIS and T-SQL development.
- Develop and maintain business and technical process documentation.
- PODS Web form front-end changes
- Created APIs from scratch
- Supply chain, logistics, inventory, and purchase order processes.
- Interface development using RESTful API and point-to-point integration solutions.

MS Full Stack .NET Developer *Rybovich Boat Company* *01/2021 to 05/2021*

- Dynamics 365 platform application support and development.
- Developing business logic for mobile app services.
- Basic database development and architecture On-Premises and Azure.
- C#/SQL Development for our Power Apps platform.
- Power BI Report and Dashboard development, and SSRS Report Development.
- Kentico CMS (i.e., Web form and MVC version) support and development.
- TV Scheduler MS Access migration to MVC .NET Core 5 Web front-end.
- Database migration of MS Access to MS SQL Server 2019

C# / BI Developer *Automotive Advertising Group* *07/2020 to 10/2020*

- Various SSIS packages to ETL data from disparate sources.
- Build and maintain dashboards, reports, and visual analytics using Sisense and Power BI
- Design reporting solutions that help stakeholders understand trends, performance, and operational outcomes.
- Work with Microsoft SQL Server environment to ingest, stage, transform, validate, and organize structured and semi-structured data into reporting-ready datasets.
- Sisense Reporting and development using ElasticCube Models
- C# supports and development of existing apps, and data load using C# programming language.

- Web API development for auto dealers using HttpClient to consume API in .NET Core.

Senior Full Stack C# Web Developer Greenspoon Marder

03/2011 to April 2020.

- Mentor and coach of Microsoft technologies such as .NET Core using Web Forms or MVC programming models.
- Part of my responsibilities include leading other developers for support of existing applications, and new application development. It involves code reviews, coding standards, and technical skills to assist developers with design and issue troubleshooting.
- 50% new development and 50% maintenance, multiple applications focusing on front end, middle tier, and backend development.
- On premises database migration to Azure Cloud services, Azure Active Directory management, and implementation of PaaS to all existing firm apps.
- Migration of Tortoise SVN repository to Gitlab, and Software Development process using Jenkins as our CI integration tool. • A summary of the latest accomplishments and challenges.
 - **A)** Timeshare Foreclosure Portal for non-judicial requests. .NET Core web app to search records on account numbers, name, and resort name.
 - **B)** A new interface to Residential Foreclosure (i.e., Perfect Practice) to view documents from our CMS system (i.e., IManage). Web API calls to IManage on the cloud.
 - **C)** Migration of CMS documents to SharePoint, and interface to our Timeshare Escrow System to pull those documents from SharePoint on the cloud instead of the on-premises IManage system.

SQL Server Developer

Treasury Government Social Security

03/09-12/10

My area of responsibilities is the design, implementation and optimization of databases, as well as development, design and implementation of databases for the Single Information System of the Dominican Social Security System (SUIRPLUS).

EDUCATION

- 2009 Oxford Seminars TESOL/TESL Certification Toronto, ON, Canada
- 1994 bachelor's degree in computer science – UNPHU University, Dominican Republic

CERTIFICATIONS

- 2025 Professional Tax Preparer
- 2004 Real Estate Associate Certification. West Palm Beach, Florida
- 2016 Voting System Technician, Broward County Supervisor of Elections
